Sealaska is Alaska Native Corporation established in 1972 under the Alaska Native Claims Settlement Act (ANCSA). We are a Native institution owned by more than 22,000 shareholders whose core Native values guide all that Sealaska does and represent the rich heritage of the Tlingit, Haida and Tsimshian people. We are guided by values to build excellence in our Native enterprise and take action toward our purpose.

**Sealaska’s Purpose:**

Strengthen people, culture and homelands through Values In Action.
SEALASKA VALUES IN ACTION

ALASKA NATIVE VALUES

They represent the core cultural values of Sealaska’s tribal member shareholders. They guide all that Sealaska does and represent the rich heritage of our people: the Tlingit, Haida and Tsimshian of Southeast Alaska.

SEALASKA’S FOREST MANAGEMENT PRACTICES
Caring for Haa Aaní — Our Land

Every tree harvested supports cultural activities, scholarships, jobs and communities.

Hand planted seedlings increase the rate of forest regeneration.

Tree thinning allows more sunlight to reach the forest floor, creating an abundance of overgrowth and vegetation for wildlife.

Basal Pruning

Silviculture is key to Sealaska’s sustainable timber harvest program. Sealaska takes care of our forests so that our forests can continue to take care of our people. When we do this, forests produce better quality timber, shorter time between harvests, increased volume of sustainable harvest and greater abundance of fish and wildlife habitat.

<td>ACTIVE HARVESTING</td>
<td>Sealaska’s sustainable approach to timber harvesting ensures healthy forest regeneration and habitat for wildlife. Important stream habitat for fish is well protected by our stream buffers.</td>
<td>HAND PLANTING SEEDLINGS</td>
<td>Since 1982, Sealaska has hand planted 8.7 million acres of forest land with 8.6 million seedlings. The use of seedlings to reforest harvested land allows new trees to take root at a faster rate than the natural regeneration cycle.</td>
<td>SEEDLING GROWTH</td>
<td>By now, plants important for wildlife are thinning and our next forests are well established.</td>
