Bowhead Transport, LLC
Built for Alaska

M/V UNALAQ

Built in 2014, the Bowhead Transport Flagship, M/V UNALAQ is a 150’ landing craft capable of carrying up to 800,000lbs on deck. She can work in extremely shallow waters providing ocean wide cargo and equipment transport, remote hotel ship accommodations, dining, and multiple support services.

More than any other vessel currently operating in Alaskan waters, the Unalaq is capable of providing multiple services in a range of environments.

She is the bed rock of Bowhead Transportation’s success and growth.

Bowhead Transport, LLC
Strategy and Diversity

M/V Kautauraq and Arvik

Spring of 2021, Bowhead Transport announced the launch of the push boat, “Kautauraq”, (The Hammer) and the barge, “Arvik”, (The Anvil). This push boat / barge combination, although small in stature is making quite an impact. Positioning Kautauraq on the Kuskokwim River, has strategically allowed Bowhead Transport expanded range of service in Western Alaska rivers.

This inland / near shore kit is a small investment that sends a big message to the marine industry,.. Bowhead Transport is growing and we are here to stay.
